Messrs. Methuen and Co's New, Publications.

A new novel by Mr. G. K. Chesterton

was announced for publication on January

22nd. It is outified "The Flying Inn "

and is a partly farcial romance of the ad-

ventures of the last English Inn-keeper,

Messrs. Methuen have also published

a new nevel by Mr. Joseph Conrad, en-

titled "Chance." In this romance,

which Mr. Conrad unfolds in his fascinat-

ing and curibus way, partly by monologue,

partly by narrative, we find the author

of " Lord Jim" again revealing one of

those strange cases of human passion and

disaster which he alone of living writers

can present. The sea is in the book,

Charles Inge, which raises again the ab-

sorbing question as to what is failure

and what success. It tells how a hig

man from South Africa sets out to con-

quer London-the London of the Lobby

and the Clubs-with a threepenny weekly

paper and sympathy for the unemployed

WHO'S WHO IN JAPAN EDITED AND PUBLISHED BY S. KURITA.

The first (1913 edition already issued. DIOGRAPHIES of over 5,000 people who are well-known in society and of. several hundred foreigners associated with Japan appear in the book. Quite new materials and accurate sketches, both being utterly free from prejudices.

Many portraits are inserted. The book contains over 1,400 pages. The price is yen 6 (12/-) or \$3 per copy. Orders for the book should be accompanied zby payment. 4

Subscribers for the second annual edition of 'Who's Who in Japan' will be allowed a reduction of one yen. The registered postage is 18 can, to Kores and China 40 sen and to Europe & America 70 sen or 35 cepts.

IT IS A GOOD ADVERTISING MEDIUM. Many influential papers of the world noticed this work in the highest terms." For example, The Daily Mail says:--Yet another Who's Who! and this time from Japan! The reader is apt at first to regard it as a curiosity, as a sign that the East has now become Western practically almost to the last detail. But

Who's Who In Japan' is far more than a curiosity; it is a very sound and useful reference book. It is printed in English 25,233,312 and contains brief biographies, on the accepted model of prominent men in Japan. Mr Kurita is a skilful editor and has done

"WIRELESS AT SEA

PROPOSED INTERNATIONAL

Partial Compulsion.

In view of rises which it is expected will be laid down by the International Conference on Safety of Life at Sea, much careful thought is now being given by shipowners to the question of wireless

It is believed that the present proposel of the Conference is that wireless tolegraphy shall be made compulsory for certain classes of vessels to be defined by the number of persons carried, the distance between the ports of call, or the speed of the ships. The net appears to be a wide one, and would include a House, Mr. James Coats, jun., died on very large number of vessels. By Ame March 22, 1912, and left the enormous rican legislation all ships calling sum of £1,964,475. The duty paid on United States ports and carrying he estate was £289,219. While there persons must now be equipped with was such a big lot of money, there was wireless installations.

When these international rules are prepared it will be necessary for owners to decide in which of the three diasecs laid down by the International Radio-telegraph Convention of last year they will place their ships. The licence will be granted by the Governments according to the class. The first class includes ships having a continuous service, the second class those having limited working hours with "watchers" during the first 10 minutes of the other hours, and the third class having no regular working

A SECOND OFERATOR.

We learn that one leading companythe Union-Castle has already definitely decided that all its mail and passenger ships shall be placed in the first class. This means that it has arranged for a second Marconi operator to be placed in more than 20 of its vessels. Perhaps special considerations attach to this line. Its outward and homeward vessels are always passing up and down the same routes and are not separated by the same great distances as those of certain other lines. Similar conditions to those applying to the South African mail service would affect the liners in the North Atlantic trade.

Some of the large companies appear to be quite content that their vessels should remain in the third group-i.e., should continue to employ only one Marconi operator with no one on duty when he is not at work. As the wireless land stations in cortain of the Colonial courtries are at present few, the one operator has, during parts of the voyage, little to-do.—The installation is now not paying venture, and the lines do not consider it reasonable to require operator always to be on duty on the chance of hearing a distress call.

STANDARD TIME.

The definition of the second class, as aid down by the Radiotelegraph Convention, presents certain important pro- the local Brough Trust. Churches, mublems which may not yet have been seum, library, and observatory have all fully realized. As indicated above, the been built in Paisley by the Coals; so Convention lays down that when the that if Paisley does not figure much in operator is not on duty in vessels in this I the wills there is no cause for disconcint. class there must be a " watcher " during | ment. the first minutes of every hour. It would therefore seem necessary that all the maritime nations should first agree upon the adoption of some standard time for this purpose. Otherwise, as every gree of kongitude represents a difference in time of four minutes, ships distant from each other by only a comparatively few miles would, if ship's time were adopted, be working during different periods. Presumbly a chronometer, rated to Greenwich or other time, agreed upon, would have to be fitted in the operator's room. Secondly, there is the serious difficulty of providing some membor of the ship's crow depuble of undertaking this duty of listening. Merchani ship's crows are paid off ab the end of oach voyage, and only a very intelligent man could be relied upon to listen for even the S.O.S. signal.

IMPERIAL FAMILY OF CHINA.

Little is heard n w of the Imperial Family of China, an that considerable interest attaches to an article on the subject which M. Jean Rodes contributes to the Temps From this it appears that the little Emperor Pu Yi, now eight years old, lives in a pavilion in the most secluited part of the Forbidden City, and which is separated by a last wall from the palace occupied by Yuan Shih-kai and his suite. On the death of the young Empress Downger from a mysterious, malady, more than a year ago, the concubines of the two preceding Emperors bitterly disputed the charge of watching over the Son of Heaven. and the struggle became such that Yuan Shih kai had to ntervene to coulde the Imperial child to two of the secondary -wives of Kwang Su. The three professors, two Chinese and one Mongol, his been committed the task of educating the young Pu Yi, who, as yet, has no knowledge, it would appear, of all that, his family and himself have lost sin e the revolution. The Wanthu Che Sia, farmerly Grand Conneillar of he Empire and Presidented the Provisional enate, is the Grand Director of the Im

perial Palace. Despite the fact that he had always before pass d for one of the most reactionary members of the Court, Yuan Shih kai appointed him to this post of confidence in grati ude for the fact that he interceded for Yuan when, at the end of 1908. the Regent designed to put him to death. With the exception of this latter perso mgwho lives in Peking, in the north of the Tartar city, and who goes almost duly to the Forbidden City, all the rinces of this ramily have has ened to leave Peking, thus le ving the most impre-sive void around the little Emperor, who, benceforward. possesses no crown. Two Imperial Princes. however, are connected with the present Government. One, the Duke Tai Tse. tormerly Minister of Finance, has been appointed guardian of the Imperial Tomba The other, Prince Pulan, wo "his not quitted his yamen in the Tartur city, is amongst the numerous advisers of Yuan Shih kai, and represents to him the Eight Banners. Describing the change in Prince

Pulun's appearance, M. Rodes says he wears Euro, ean dress, and is an habitue of an hotel in the Legation outster, where he often goes to ply a gome at billiards. In seeing him, thus, it is difficult to realise that he only just failed to b come the Sou of Henven, the Empress Tsen Hai having at one time, a few years ago, had the i tention of choosing him as heir to the throne. The ot er descendants of the dy asty have, for the most part, taken refuge at Tientsin, where they live in the German concession. This is the case notably with the brothers of the Regent, thanghat, Rangoon, Samarang, Sourabaya, Tsai Tao and Tsai Tsun, of Prince Chin Diember, Cheribon, Tegal, Pecalongan, doven of the family, and of his sons. Then Prince Kong and Prince Su are in the German colony of Tsingtau. The young Prince Tasi Tao, who, during the la-

years of the Empire, was at the head of the Army, and who, in 191, came to Eur pe at the head of a military mission, generally appears in a sportsman's dress, wit knickers and leggings, and he is to be seen dressed thus at Peking from time to time It is said that he was offered the chance of being one of the President's counsellors. This he refused, but his consent is no despaired of. Prince Ching, who is called at Tientsin the old gentleman, who was for a long time under the Empire the most powerful man in China, lives mow in | mined. profound retirement. He goes out very

little and receives on one, his unique praoccupation being that of pr fitably utilising his enormous fortune, which, up to now, has slumbered in foreign banks. He has, for example, some thirty millions of france in god bas, in two of these and that is only a small of what he possess. His sons. live in the same city, appear to have other thought than that of leading a life

pleasure. They have a mirked taste for Western pleasures, and will be seen, no doubt, one day in Paris, in the amusement quarters. . One of them, the writer was told, was, curiously enough, at one time the pleasure companion of a Chinese re volutionary who, in 1910, threw a lomb at the Regent. Amongst these Princes profound indifference and complete disin terestedness on the subject of the political events which have brought shout the f l of their family and race is affected. It is the only man espable of at present assum responded to someone who questioned him dage of bad ten." The only member of the family who is looked upon as energetic, and he had been thought of, it appears, in case of success, as a possible President of the Republic. All this ecome very insufficient to prevent Yusa Shib-kai from

MOST POPULOUS CITY. LONDON'S SUPREMACY STILL

MAINTAINED.

The Claims of New York.

Population statistics have a peculiar fascination for the American citizen. Everybody has heard of the "population clubs" which seek to raise the cities in which they exist higher in the statistical scale. This is often the form taken by competition between neighbouring communities, and the standard adopted is almost invariably an American one. It is different with New York, which holds an unchallengeable pesition as the most populous city in the United States, Still New York has a population passion; it is its ardent wish to stand at the head of the cities of the world. Its wonderful growth in the last few decades has already given it second, place on the list. It has a greater population than any of the teeming communities of the East, and it has outdistanced Paris, Berlin and all the other great cities on the Continent of Europe. London alone stands in the ways of its ambition. Twenty years ago "American nowspapers were in the habit of discussing the date at which New York would have a larger population than London. " Now, if the quotation which our New York Correspondent made yesterday from the "Post" of that city may be taken as a guide, efforts are being made to prove that the feat has been achieved.

The "Post," it will be recalled, stated

that New York, having passed London in 1910 as the first city, now leads the former greatest population centre b nearly a million inhabitants." We are further told that Mr. Guilfoy, of the Board of Health, estimates that Greater New York has to-day a population of 5,476,966, whereas the estimate on July 1st, 1913, credited London with a popu-Vation of 4,518,191. What is this London which has a population of only 41 millions? For there are several Londons to the statistician and geographer: There are the Metropolitan Police District, the Central Criminal Court District; the main dramage area, and the water rea. Even the Census Statistics recogaise three Londons: the central area. the County of London, and Greater London. The Administrative County of London had a population of 4,521,685 at the Census of 1911. This is obviously the London to which the American writer. efers, for the Register-General, in his

last Census, which in its turn showed for the proximity of New York, and that for purposes of local government. It is and New Jorsey suburbs. The population hemmed in on every side by other such at the last Census was still only much Londoners as those living in the county area.

Registrar-General's estimate of the nonuition in the middle of 1913 was .411.885. We are told that the estimated population of Greater New York is ,476,966; so New York is still nearly two millions short of its ambition.

New York, however, if its citizens desired might put in a further claim. the area of Greater London is nearly 603 square miles; that of Greater New York is only about 320 square miles. Why should not New York for the purpose of population statistics, be held to include the nieghbouring districts on the other side of the Hudson River? as a commerical venture requiring the earning of interest on the immense capital which has been sunk in the undertaking. We think that the British Board of Trade regulations would have afforded an equitable basis for the Panama Canal ducs; and that the adoption of those regulations would have given more general satisfaction to the users of the canal than any other rules. A it is, the general effect of the Panama Canal Rules appears to be that the gross tonnage as measured by these Rules will be slightly greater than the Sucz Canal gross tonnage, but, with the more liberal allowances permitted by the Panama Rules, the net toninge (upon which dues are charged) will be somewhat less.

By the Panuma Rules, all vessels, American and foreign, except war ships, applying for passage through the Panama Canal will be required to Co. Ltd present a duly authenticated certificate stating the vessel's gross and net tonnages as determined by these Rules Should such certificate not be forthcoming, then the vessel will be measured and her tonnage determined in accordance with these Rules before she passes through the canal or is allowed to clear therefrom. The officials who may measure vessels and issue certificates are those who are authorised in the several foreign

countries and in the United States to do so for purposes of national registry, and such other officials who may be authorised by the President of the United States to measure vessels and to issue Pathina Canal tonnage certificates. Warships, American and l'ondot de temmy, and Madame Revuf | foreign, will be required to present duly authorised displacement scale, and curves stating accurately the displacement tennage at each possible

mean deaught. The measurement of the under-deck tonnage is the same according to the Panama Rules as for the British and Suez Canal Rules for vessels constructed with double bottoms, having the kiner bottom horizontal; but by the American Rules the tonnage of double-bottom spaces intended for oil fuel and feed water is added. The deducted from the gross tonnage independently of the allowance for propelling power. In the cases of yessels which the inner bottom is higher at the margin than at the middle line, the Pannan measurement will be the same as the British under-deck tonnage, which is about 3 to 4 per centgreater than the Sucz Canal tonnage at the Police Court this morning with American vessels having double buttoms of the form described are mensured for their national registry under the Suez Canal Rules, and for the Panama Canal certificate the They were each fined \$10. under deck tonnage will be increased

accordingly, and be in agreement with the British rule. To illustrate the importance these Rules to the shipping community, it is interesting to note that under the Board of Trade Rules a slielter-deck steamer 410 ft. by 54 ft. by 25 ft., having an exempted 'tween deck space, is computed to be of about 4400 tons gross and tons net whereas the Suez Canal gross tominge of the same vessel would be about 6000 tons and net 4500 tons. Again, to take the case of an ordinary cargo steamer 375 ft. by 52 ft. by 25.5 ft., with poop, bridge-house, and forecastle, the Board of Trade net tonnage works out at about 2800 tons, 12 Tsingtau's !! band. Coolies amployed in the Public Works' Department were quickly on the scene, and the road was made passable in a very short times. In the interim, the

There was a quantity of coal stored in no one was at work. Two hours previous 30 or 40 coolies were engaged inside the considerable. The damage is extensive. So far, the ori in of the accident is un-

knowledge of his staying power but his superior speed should help him to be first past the pist on more than one occasion. Mexic n Chief, a small brown pony, has been sent over long distances and has per official Ruce Book have been suggested formed quite consistently: Mr. Medico's Aldwich, a very nice type of a racing China pony and, so far as the stop watch is concorned, absolutely quite in a class by himself. Not once during the training has this pony pur in a bad finish, his times have been quite remarkable and had te not been selected for a Hongkong Subscription Griffin. would be worth quite a deal of money as a time Griffin, Mr. Meiland has a couple of who must not be everlooked; the noted has a remarkable conformation and has galloped some long distances in quite respectable time. He is the sort of pony who has shape, speed and looks, and on the "List of All Stables Entered" the race day might be anything or nothing, it depends solely on his inclination. His stable companon Goode Hop is also one of

spotted white, is a pony that has not been noticed much by the stop watch contingent, but on Thursday he rattled off a half mile in 1-02 with a last quarter in 30 seconds and has also done a mile in 2-21 last (Specially Written for the "CHINA-MAIL.") | quater 32. Arrayand is another fast improving pony, in his last three or four gallops he has always beaten his stable companion and Brown Boy is a pony that takes the eye immensely; he has a grand shape, has a good shoulder, and stands over a lot of ground; but it appears that his owner is adopting the slow and sure policy of training, but whether this method will prove successful with the races only a week away is doubted by many. Monarch D.hlia may be rated upon the same plane as Aldwich : Chorus and Soil-" All who for servants " ne is a discard of Mr. Ellis Kadoorie's bu since he has take up his quarters in Sir Paul's stable he has improved out of all knowledge. In my opinion he and Aldwich are the two best Subscription Griffins. Mr. John Peel's stable shelters a 12 grey pony called The Cat who is very fr a short distance but gallope as though his heart was not quite in his work; he possesses however great speed and must be watched in sprint races. We now come to a dark horse, about whose capabilities little is known; I refer to Rosario. This pony is of fancied by his owner and his jockey; however the stop watch brigade have never had their hearts in a flutter over his performances. We hope however to see him sent in company during this next week and then shall be able to form a better opinion. Pegasus, a small mealy nosed light coloured bay, has also put up some quite decent gulops and contrary to colour expectations, puts a deal of heart into his work and seems to revel in galloping. Tango, a once much fancied candidate belies his name instead of being light airy he is of the dull heavy temperament; but is probably being

allope i out of his distance, three quarters appearing to be about his limit. Pheasant. Brympton, Candy Kid, all appear to have speed, but when sent over a distance are unable to finish; but as we mentioned

THE PHILHARMONIO SOCIETY'S CONCERT.

There was a very large sudience

which included H.E. the Governor, Lady May and Party-at the Theatre Royal on Saturday evening on the occasion of the Annual Concert by the Hongkong Philharmonic Society. The programme was a very attractive one, comprising, in the first part, six miscellaneous items of a high order and, in the second part, the concert version of Flanquette's delightfully molodious opera, "Les Cloches des Corneville." Numerically, the chorus seemed to be quite as large as is was last year, and it was soon evident that Mr. Dooman Fuller had again been eminently successful in training the several sections of his large choir to respond effectually to his baton. The famous chorus from Gounod's "Faust," was rendered with all the necessary martial fervour, and made a very fitting opening item. The choir were equally successful with " The March of the Men of Harlech " and " The Bluebells of Scotland," the latter especially being most beautifully sung. Baraby's exquisite part song "Silent Night" was delightfully" rendered by Mosdamos Cromie, Goldsmith, Goodman and Miss L. White and Mesers, J. W. White, F. Biden, R. Peyton-Griffin and A. J. England. The first part also comprised the performance of R. Howgill's " Pagtorale " by the orchestra, which was very highly appreciated, "A very fine, but an unconscionably long, Rubenstein Sonata for violin and piano was contributed by Fran Amy Lund (violin) and Mrs. Grove (pianol. Both proved themselves very highly talented players of their respective instruments, and their performance was greatly appreciated. The first part

concluded with what was described as Rhipsody for Pinno and Orchestra " on a very well-known air-the "very well-known nir being "The Miller's Daughter.". Both Mr. Foller and the orchestra, conducted on this occasion by Mr. Chapman, gavo a splendid rendering of the whimsical composition, which, indeed, was a very clever piece of orelies. tration. Lond applause greeted the performance, part of which was repeated

by way of encore. Both soloista and chorus adquitted themselves creditably in "Tani Clocher de Corneville," though, occasionally, thre high-pitched music was rather too much for some of the soloists. Still, they all did very well, and gave a very pleasing nterpretation of the many delightful sclos of this once very popular and

deliciously molodious opera. The programme was a follows:-Miss L. White and Mr. A. J. England. Song "On billow rocking"

HEROES' DECORATION DIS-

APPROVED. (To the Editor of the "CHINA MAIL") Dear Sir,-I see it announced that Congressman Dale will introduce a Bill in Washington commending the brave deed of the Officers of the "Gregory," that the Carnegie Hero Fund will make recognition of their heroisin, and that the officers have been entertained at a banquet at the New York Press Club and presented with gold medals. This case of a gallant rescue on the high seas by British officers at imminent risk to their own lives is parallel to that of the s.s. "Augustine" belonging, as it so happens, to the same company, the Booth, Stramship Company. The officers of the "Augustine" themselves jumped into the raging sea to save the hapless crew of a foundering Greek steamer, and their bravery excited universal admiration at the time. So impressed with it were they that the Greek Government subsequently informed the Imperial Merchant Service Guild that they had decided to confer upon Captain Forbeauand the officers of the 'Augustine" the Decoration of the Order of the Redeemer of Greece. In due time, the Order not being forthcoming, the drizzling rain did not prevent a large Government. It was then elicited that Estimated population ... THE WORLD FAMOUS MAUD ALLAN AND THE CHERNIAVSKYS.

When the incomparable Maud Allan, the world's most famous classical dancer and the Cherniavsky Brothers, whose names are now household words in many countries, open here for their recitals, it is predicted that exceptional enthusinsm will be aroused. Maud Allan is the last word in the Terpsichoreen Art, and her audience are always captured by the alluring symbols of her dencing; and the rhythm, in the expression of which, her limbs are as poetic as those ci Goddess Terpsichore. She expresses every emotional and spiritual thought from this melody and harmony of irrepres-

sible joy to the strains of expiring life. Undoubtedly one of the noteworthy ovents of the coming musical season will be the appearance in Hongkong of the Brothers Cherniavsky, whose reputation in London, the English provinces and throughout the world has grown during the last two sessons in a manner little short of amazing. It might have been supposed that the sun of wonderment had set upon the age of musical prodigios, but these three clover Russians have succeeded in staring the most critical of London andiences to an entitue sem recidling the corlier days of Mark Ham-

boilty and Josel Hoffmann. The recitals will take place at the Thesize Royal on 16th, 17th and 18th Pelituary; and the plan at Moutrie's is filing up. The above combination touring the Far East under the direction of D. E. D. Cohon - Contributed.
